Uncover Norway's Best-Kept Secret:

Senja

For decades, Norway has captivated travellers with its scenic vistas and natural offerings. Its cities, like Tromsø, embody the rich history and culture of the country. However, it's the lesser-known islands of Norway that truly testify to the country's raw beauty and bewitching wonders.

Senja

Situated in the heart of the Aurora Zone, above the Arctic Circle, Senja is the second largest island in Norway. Similar to Sommarøy, Senja is also notable for its thriving flora and fauna, and is comprised of some of the most memorable and picturesque spots in the country.

Senja leaves visitors at a loss for words with its impressive views of the vast sea, towering peaks and small fishing villages. Apart from the sea and land-based activities, the island is a great place to watch the Northern Lights. And what better

way to witness this magnificent sight than to watch it from the comfort of your own room? **Hamn i Senja**, a holiday resort which is situated by the open sea, offers amazing and unhindered views of the Northern Lights. Watch the natural phenomenon rapidly change colours as light up the skies above and the surface of the sea below.

The combination of Arctic adventure and Aurora displays make this island a true Norwegian wonder that you have to see to believe.
